

# Tabebuia pallida

Kingdom:	Plantae
Clade:	Angiosperms
Order:	Lamiales
Family:	Bignoniaceae
Genus:	Tabebuia
Species:	T. pallida

- Common Name: Often referred to as "Pale Trumpet Tree."
- Family: Bignoniaceae
- Origin: Native to the Caribbean
- Tree Type: Deciduous tree
- Height: Can grow up to 15 meters (49 feet) tall
- Leaves:
- Type: Opposite, palmately compound leaves
- Leaflets: Typically 3 to 5 leaflets per leaf
- Flowers:
- Appearance: Large, showy trumpet-shaped flowers
- Color: Pale pink to white
- Blooming Season: Primarily blooms in the dry season
- Fruit:
- Type: Long, slender pods
- Seeds: Numerous, winged seeds for wind dispersal
- Wood:
- Characteristics: Hard and durable
- Uses: Occasionally used for timber and construction
- Habitat: Thrives in well-drained soils and prefers full sunlight
- Cultivation:
- Watering: Drought-tolerant once established
- Pruning: Prune to shape and remove dead branches
- Landscape Use: Popular as an ornamental tree in gardens and urban areas for its attractive flowers and shade
- Environmental Impact
- Benefits: Attracts pollinators such as bees and hummingbirds
- Adaptation: Well-adapted to tropical and subtropical climates
