FIELD WORK
ACADEMIC YEAR 2022-2023
BATCH 2022-2025

A fieldwork trip to S. Mudugandanahally villages was undertaken by first-year BCA students from the Department of Computer Science in May 2023. This fieldwork's main goal was to survey rural people about digital change and socioeconomic development.

The purpose of the student's surveys and interviews with the villagers was to learn about their experiences with digital transformation. The pupils were split up into eight groups of ten or eleven, and each group was given a designated area of concentration. A number of subjects were examined, including Digital literacy, Telemedicine and healthcare, Communication and social media, E-commerce training and support, Government services and Digital governance, E-learning and remote education, The impact of e-commerce on small businesses, and Online digital payment solutions.

The students gathered data and insights about the digital transformation of S. Mudugandanahally communities by conducting in-depth surveys and interviews throughout the course on May 20, 2023. During this fieldwork, the student's efforts to investigate the effects of digital technologies on the socio-economic environment of the hamlet were motivated by the Department of Computer Science's focus on digital transformation. By means of cooperative study and data gathering, the students endeavored to pinpoint pivotal domains for intervention and enhancement, establishing the foundation for subsequent endeavors that would foster digital inclusion and empowerment inside the communities.

In conclusion, the fieldwork conducted by the first-year BCA students in the villages of S. Mudugandanahally proved to be a fruitful and educational experience from which they learned a great lot. In addition to giving them useful perspectives on the difficulties of digital transition and the realities of rural living, it also gave them important research, data collecting, and community engagement skills.
