

## St. Joseph's College of Arts and Science for Women, Hosur.

### Swachh Bharath Report- Clean India

The Swachh Bharath of St. Joseph's College of arts and science for women, Hosur organized a "Clean India" event on 02.10.2019. The campaign aims to achieve the vision of a 'Clean India' by 2nd October 2019.

In a commendable display of civic responsibility, Our College 50 students participated in a Swachh Bharat (Clean India) initiative on October 2. Focusing their efforts on the local flower market, the students actively engaged in cleaning and waste management activities. Armed with biodegradable cleaning supplies, they meticulously cleared litter, promoting hygiene and environmental consciousness. The initiative aligns with the broader national mission of Swachh Bharat Abhiyan, fostering a cleaner and healthier community. Through their collective action on Gandhi Jayanti, the students not only contributed to a pristine flower market but also embodied the principles of Mahatma Gandhi in practicing cleanliness and community service.

## **PROPER DISPOSAL OF SOIL AWARENESS**

**DATE: 22.04.2020**

The Swachh Bharath Committee of St. Joseph's college of arts and science for women, Hosur organized a 'Proper Disposal of Soil' on 22.04.2020. The campaign aims to achieve the vision of 'Proper Disposal of Soil' by 22<sup>nd</sup> April 2020.

Our College students actively participated in the Swachh Bharat by organizing a cleanliness drive in Muduganapalli. Soil is a valuable natural resource crucial for sustaining life on Earth. However, improper disposal of soil can lead to various environmental and societal issues. To address this concern, a public awareness campaign focusing on the proper disposal of soil is essential.

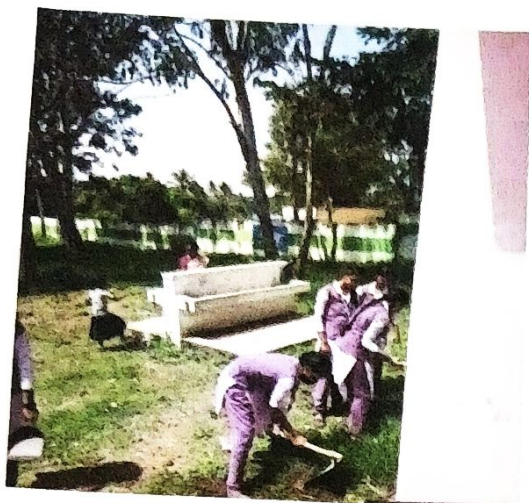

Soil is a vital resource that supports plant growth, biodiversity, and ecosystem health. Improper disposal of soil can lead to erosion, sedimentation of water bodies, loss of fertile land, and contamination of water sources. Proper soil disposal involves following regulations, such as avoiding dumping soil in unauthorized areas and using appropriate methods for soil remediation. Responsible soil management practices, such as composting, recycling, and soil erosion control, contribute to environmental sustainability and conservation efforts. Community involvement and cooperation are essential for the success of soil conservation initiatives. Increased Awareness: Measure the campaign's effectiveness by tracking the reach and engagement of educational materials and social media content.

Promoting proper disposal of soil through a comprehensive public awareness campaign is essential for safeguarding this valuable resource for future generations. By educating individuals and communities about responsible soil management practices, we can contribute to a more sustainable and resilient environment.
