01.07.2019

Circular

We take great pleasure to announce that on 08 July, 2019 we are planning to conduct **Campus Clean Up** for BBA (CA), B.Com and BCA. The campus clean-up event was a resounding success, with enthusiastic participation from students, faculty, and staff. Armed with gloves, bags, and determination, volunteers combed through every corner of the campus, collecting litter and debris. Together, we made significant progress in enhancing the cleanliness and aesthetics of our environment.

St. Joseph's College of Arts and Science for Women

Recycling program

Date: 12.02.2019

Report:

Mrs .C. A. Uma Assistant Professor in the Department of Management spearheaded a recycling program for 52 I B.Com (CA) students, emphasizing regular self-assessment. The initiative encourages students to evaluate their recycling practices, identify areas for improvement, and implement sustainable habits. Through consistent self-assessment, Mrs. Monica fosters a proactive approach to waste reduction and recycling within the academic community. This hands-on strategy not only instills a sense of environmental responsibility in students but also cultivates a culture of conscious consumption and recycling. Mrs. Monica's program equips I B.Com(CA) students with the tools to contribute meaningfully to a more sustainable future.

FEED BACK.

The program organised by green waves committee on topic recycling. The program was very interesting and useful. We learnt more things how to recycle things and how to come out of more wasteful things. We learnt how to make use of waste things. Many got idea to how to reuse the waste things without throwing those things. It gave more information. We Thank you for conducting this program.

FEED BACK.

The program organised by green waves committee on topic recycling. The program was very interesting and useful. We learnt more things how to recycle things and how to come out of more wasteful things. We learnt how to make use of waste things. Many got idea to how to reuse the waste things without throwing those things. It gave more information. We Thank you for conducting this program.

Feed back

The program was organized by Green ways committee on topic recycling. The recycling process help to reduce your carbon footprint but it also helps to reduce the need for harvesting raw material, saves energy, reduced green house gases, prevent pollution and more. Through the recycling process it helps to keep remain waste greenery.

Feed back.

Recycling reduces waste sent to
landfills and incinerators. Recycling
prevents pollution. Recycling conserves
natural resources. Recycling conserves
energy. Recycling creates jobs,
producing economic benefits.

Feed back.

Recycling can prevent wastage of natural resources. It can prevent pollution, can

save the environment, and helps to create more useful items.

So it is our responsibility towards the environment and we should also teach the environment and others to recycling.

RECYCLING

GREEN WAVES
COMMITTEE

FEEDBACK :

Recycling is good for the environment ; in a sense , we are using old and waste products that are of no use and then converting them back to the same new products . Since we are saving resources and are sending less trash to the landfills , it helps in reducing air and water pollution . There is no such thing as away when we throw anything away it must go somewhere . When you put the whole recycling in the right thing to do .

on Recycling

The Recycling is a good for the environment as someone are using old and waste products that are of no use. And then converting them back to the same new products, since we are saving a resources and are sending less trash to the landfills, it helps in reducing air and water pollution. In Recycling there is no such thing as away when we throw anything away it must go somewhere. when you put the waste things in the right thing to do. a environment

Circular

We take great pleasure to announce that on 12 February, 2019 we are planning to conduct **Recycling Program** for BBA (CA), B.Com and BCA. The implementation of the recycling program yielded promising results, marking a significant step towards sustainable practices on campus. Through informative signage, dedicated recycling bins, and educational campaigns, awareness about waste management soared among students and staff. Participation rates surged as individuals embraced the opportunity to divert recyclable materials from landfills

Circular

We take great pleasure to announce that on 30 July, 2019 we are planning to conduct **Water Conservation Program** for BBA (CA), B.Com and BCA. The water conservation program has achieved commendable success in promoting responsible water usage across campus. By implementing efficient fixtures, educating the community on conservation techniques, and regular monitoring, we've significantly reduced water consumption. Awareness campaigns and practical workshops have empowered individuals to adopt water-saving habits in their daily routines.

organizes a
Water conservation program**

Date: 30.07.2019

Report:

Mrs. R. Prailin, Assistant Professor in the Department of Nutrition and Dietetics, initiated a comprehensive water conservation program for 55 III B.COM students. The program emphasizes regular self-assessment to gauge individual contributions to water conservation. Students actively participate in monitoring their water usage, identifying areas for improvement, and implementing sustainable practices. Mrs. Prailin's approach fosters a sense of responsibility and awareness among students, promoting a culture of water conservation. This self-assessment strategy not only empowers students to make informed choices but also instills a lasting commitment to environmental stewardship within the academic community.

WATER CONSERVATION

The green waves committee on St. Joseph's college of arts & science for women. Conserving water saves energy. Energy is needed to filter, heat and pump water to your home, so reducing your water use also reduces your carbon footprint. Using less water keeps more in our ecosystems and helps to keep wetland habitats topped up for animals like otters, water voles, herons and fish. The finding showed that households that were equipped with smart water meters increased their water savings. Water conservation session is very useful.

The session of Green water
committee organized by water
conservation at St. Joseph's college
of Arts and Science.

Your efforts in water conservation
are commendable, implementing
simple practices like fixing leaks
and using water-efficient
appliances can make a significant
impact well done of a great job
on reducing water usage conserving
water not only helps the environment
but also lowers your utility bills
keep up the good work.

The session of Green Spaces Committee organized by Water Conservation at St. Joseph's College of Arts and Science. Great job on reducing your water usage. Conserving water not only helps the environment but also lowers your utility bills. Keep up the good work.

Your efforts in water conservation are commendable. Implementing simple practices like fixing leaks and using water-efficient appliances can make a significant impact. Well done.

GREEN WAVES COMMITTEE ORGANIZED
St. Joseph's College of Arts & Science For
women, Hosur

on the topic :
water Conservation

It is very useful for us the water conservation, the capturing rainwater for plants and Using a broom instead of hose for cleaning outdoor spaces. To tell about the dedication of water saving is making positive impact on our resources. the water saving habits into our routine life. It is saving a water is good habits for the water conservation.

Green waves Committee at St. Joseph's
college of arts & Science for Women, Hosur.

On the topic of Water Conservation:

The water consumption of
the for the unnecessary things
should be avoided. People should
have a practice of save the
water for the future need. They
should save the water & do not
pollute the water.

GREEN WAVES COMMITTEE

The Green waves committee organized by St. Joseph's College of art's and science for women, Hosur. It is very understanding. It encourage individuals to be mindful of their water consumption. Promote efficient irrigation to encourage the use of drip irrigation system and watering during cooler parts of the day to reduce evaporation. The findings showed that household that were equipped with smart water meters increased their water saving. It includes population, household size and growth and affluence all affect how much water is used.

Green waves committee St. JOSEPH'S
College of Art & Science For women

On : Green waves committee:

* The green waves committee organized by it.

Green waves. It is very understanding. It

encourage individuals to be mindful of
their water consumption, promote efficient
irrigation to encourage the use of drip irrigation
system and watering during cooler parts of
the day to reduce evaporation. The findings
showed that household that were equipped
with smart water meter increased their
water saving. It includes population,
household affluence all affect how much
is used.

GREEN WAVES COMMITTEE.

The green waves Committee encourage all the individuals to be mindfull of their water consumption by fixing leaks, taking shorter showers. and turning off taps when not in use. we encourage the use of drip irrigation systems and watering during cooler parts of the day to reduce evaporation. This advocate for the installation of water - saving devices with some machines. This was the best and good experience.

GREEN WAVES COMMITTEE

St. Joseph's college of Arts & science
for women, Hosur.

On: ~~Water~~ Conservation.

It is fantastic to see you
incorporating water saving habits
into your routine. Every drop
counts, and your commitment to
turning off faucets and using
a low-flow showerhead is
making a positive difference.
Your water saving strategies
are making a real
difference.

Green klaves committee is organized
on. St. Joseph college of arts and Science.
for women. on the topic of klaves
conservation. are used to reduce unnecessary
klaves usage. klaves conservation is very
important beacuse. fresh clean water is
limited resource as well as costly.
So we need to know how to use the
klaves in that wanted places only.
Life without water is not possible.
So we need to use it carefully.

Green water committee st. Joseph's collage
arts and science for women - Hosur. on the
water conservation are very useful to suggest a
water for rain water and use and to
reduce unnecessary water usage and water
conservation is very important to save a
water and push clean water to use. so
we need to know save a water in water
conservation. water is vital for all living being
to maintain life on earth conserving water
is important because we cannot without it health.

Water Conservation Session was useful and it created a awareness about how we can use water without wasting it. Also taught how to restore the rain water. Water is essential to protect the environment. Water should be clean so that we dont prone to any diseases. We should not allow the water to be stagnated. All these useful informations was given by "GREEN WAVES COMMITTEE" of St Joseph's college of Arts and Science for Women, Hosur. Which should be followed by every citizen to keep Our environment clean. Awareness On 'WATER CONSERVATION' should be given to all the peoples in the society. By the way we are very thankful to Green waves Committee for pouring their knowledge of awareness on water Conservation.

Thankyou.

WATER CONSERVATION

Water Conservation session was very useful and the session was very interesting session. And we got awareness about the water conservation. we learned something about the water. And how to use water in day to day activities. Water is very important in daily life. And this all information is given by the GREEN WAVES COMMITTEE and it is very important session and we learned so many things about the water. And about benefits of water we learned. without water we cannot survive in life. And we learned that we should not waste the water in daily life.

Thankyou,
